

SR 520 Bridge Replacement and HOV Program

Medina to SR 202: Eastside Transit and HOV Project

May 2012

Tree removal and retaining wall construction begins Monday, May 7

Detour in place through 2012

- Northeast Points Drive remains closed west of 100th Lane Northeast and east of 96th Avenue Northeast through 2012, and single-lane closures will be required along Northeast Points Drive east of 100th Lane Northeast to safely complete the work.
- Drivers should continue to use Bellevue Way to access Northeast Points Drive east of 96th Avenue Northeast.
- Pedestrian and bicycle access will be maintained on Northeast Points Drive at all times.
- As part of this work, all trees between Northeast Points Drive and SR 520 have to be removed to make room for new retaining walls that will support the wider highway and regional bicycle/pedestrian path.
- Construction of retaining walls will begin when tree removal is complete, in approximately one month. Wall construction will continue into 2013.
- The retaining wall facing Northeast Points Drive will have a textured finish called Cascadian Stone. We will replant shrubs, vines, and, where possible, trees along the base of the new retaining wall when it is complete. See reverse side of this page for an illustration.

For more information or for questions and comments:

- Call the Construction Hotline: 425-998-5200
- E-mail Dan Galvin: dan.galvin@gcinc.com

Conceptual rendering of the NE Points Drive wall

Note: This illustration represents the conceptual design, shared in 2010. The final wall will have a stamped concrete finish called Cascadian Stone (see inset). A 6- to 12-foot noise wall will be built between the regional bicycle/pedestrian path and the highway mainline.
